## SECTION 1 – WHAT IS THE LAW OF ATTRACTION?

*1. All that we are is the result of what we have thought: it is founded on our thoughts, it is made up of our thoughts. If a man speaks or acts with an evil thought, pain follows him, as the wheel follows the foot of the ox that draws the carriage.*

*2. All that we are is the result of what we have thought: it is founded on our thoughts, it is made up of our thoughts. If a man speaks or acts with a pure thought, happiness follows him, like a shadow that never leaves him.*

## WHAT IS THE LAW OF ATTRACTION?

### Attracting Your Desires

The Law of Attraction (sometimes known as “The Secret”) is a principle that says you attract what you think about in your life. If your thoughts revolve around finding a large sum of money, according to the Law of Attraction, reality will manifest itself around these thoughts and find a way to give you a large sum of money.

One way to look at this: what you think about often has a way of manifesting itself in your life. If you are in school and worry about failing exams, the possibility that failed exams will manifest in your life increases (and hence you keep thinking about it—the Law of Attraction is a cycle). If you are thinking about succeeding on your exams, you will find ways to make that reality occur.

Think about success, and success will be yours.

What you are thinking about at any given moment is your reality at that moment. If you are thinking about something it already has something to do with your reality and given situation. What you think about will tend to be what you are preparing for in the future and how you will act and react in any given situation. Hence what you think about has an indirect effect on what occurs in your life.

According to the Law of Attraction you can use this principle to your own benefit. If you decide you want to manifest money, for example, and desire for this to occur, your brain will begin finding ways to manifest money in your reality.

### Intentions

Once you begin thinking about it and “set an intention” (a common term used in Law of Attraction writings—to set an intention is to decide to manifest something) the idea will begin searching for ways to manifest on its own. You may find a side job in the newspaper, for example, or an old antique in your house that turns out to be worth a lot of money.

Say you need an affordable car to get to work. If you set an intention to get an inexpensive car your brain will begin looking for ways to get the car.

You will find ways outside the obvious to achieve this—you will look at car dealerships and newspaper/online ads, but you’ll also ask around if relatives have a car they could give to you or sell. These people will begin looking out for you too. Soon your entire personal universe is helping you manifest your desire for an affordable car!

Your desires await you.

### Intention Tips

- Be firm and honest about what you want.
- Be specific about what you want.
- Use word like “I will” rather than “I hope to.”
- For specific events or desires, act like the event has already happened.
- Be conscious about your choice of words—the Law of Attraction can be very literal.

### **Famous People Who Use the Law of Attraction**

Many celebrities and famous people use the Law of Attraction to their benefit. Some of these include Oprah Winfrey, Jim Carrey, Arnold Schwarzenegger, Will Smith, Lady Gaga, Jay-Z,

Drake, and more. The Law of Attraction is not exclusive to these people: they used it in their life to their own benefit, and you can too.

Arnold Schwarzenegger used the Law of Attraction to become one of the world's greatest bodybuilders: you too can achieve your life's desires.

### **Does Everyone Use the Law of Attraction?**

Some believe that everyone in the world already uses the Law of Attraction to manifest what happens in their life: that we already attract what occurs in our life through what we think. This is not to say that people starving in third world countries manifested their reality through the Law of Attraction—but the situation in their country and the world at large was created through the Law of Attraction and those people were thrown into their own specific situation (as everyone else in the world also was). To use the Law of Attraction is to take conscious control and responsibility for your life.

This is where sayings like “Everything is vibration” or “thoughts create reality” come from. Thoughts have emotional content; this emotional content has been interpreted by mystics throughout the ages as vibratory. These emotional “vibes” influence our thought, and what we think about creates what we do.

What you think about transforms how your life will play out-- as the old saying goes, be careful what you wish for!

## SECTION 3 – HOW CAN I USE IT?

---

*“Dare to live the life you have dreamed for yourself. Go forward and make your dreams come true.”*

*--Ralph Waldo Emerson*

Use the Law of Attraction to create abundance in your life.

There are a variety of ways to help the Law of Attraction manifest your desires in reality. These include writing down your desires, visualizing exactly what it is you want, and feeling gratitude towards the universe. In the beginning it may help to focus only on attracting one thing at a time. One caveat to the Law of Attraction—don't use negations in your affirmations or desires (in what you are trying to manifest). If you say “I don't want to get hit by a truck,” your mind still thinks the thought “I want to get hit by a truck.” The subconscious mind does not process negation. Focus on things you do want to manifest and let things that you don't want fall by the wayside.

### 1. Writing Down Your Desires

## WHAT IS THE LAW OF ATTRACTION?

Write down your desires to increase the functioning of the Law of Attraction. Like most things in life, the more effort you put into the Law of Attraction, the more it will give you back in results. Writing down your desires confirms your intention to manifest your specific desires in reality. When your desires come true, you can look back on desires you wrote down which will increase your faith in the principles of the Law of Attraction.

### **2. Visualizing Exactly What You Want**

If you can see in your mind's eye what you want to happen you are already capable of thinking of a way that event could happen. Visualize exactly what you want in excruciating detail. The more you can think about what it is you want, and possible ways to go about enacting and getting what you want, the more likely your desire is to come through via the Law of Attraction.

### **3. Feeling Gratitude Towards the Universe**

The more grateful you are towards the universe, the more open you will be to allowing the universe to help you and give you your desires. Feeling genuine gratitude towards the universe will also make you feel more content. Even if you don't feel grateful for your current situation, you can try faking it for the moment—feeling it a little bit will tend to increase the effect and lead to actual gratitude.

### **4. Negation**

The unconscious mind does not process negation. Thinking “not” is akin to repressing a thought, and as any good Freudian knows, repressed content will express itself through the unconscious. This can also be used to one's advantage. For example, if you expressly try not to do something, your unconscious mind will find ways to express that repression. If you find you work against yourself a lot of the time, or work better unconsciously than consciously, this could be a good method for you. Pick one of your desires and expressly try not to fulfill it—you may find the desire manifesting itself in your life “against” yourself!
