

'SENTINEL' BRIEFCASE DEFENDER

MODEL QWX3

Features and Specifications :

- QuWave's most powerful Defender Model.
- Built into a small industrial briefcase with metal frame and gray fiberboard
- Has a padded carry handle and metal latches that can be secured with a lock
- Protection from: Electronic, Sonic, Laser, HAARP, Psychic, Psychotronic, Spiritual
- Effective with both low and high frequency intrusions
- More than Twice the power of our Tabletop Model
- Has two sets of four gold plated mobius antennas
- Cyclically varies frequencies for countermeasures
- Offers both protection and soothing relief
- Looks like a Small Briefcase 13.4" x 9.5" x 4.7", 7 lbs
- Portable Battery/AC/Car powered - battery lasts about 4 days between charges
- Can use in Home or Car as fixed permanently plugged-in model
- Has three internal LEDs to show operation, a Charge LED, and a battery meter
- Has an external LED on case to show operation (can turn-off with switch)
- Rechargeable battery includes International AC Charger and Car Adapter

The 'Sentinel' Defender is QuWave's newest Defender model. Built into a small briefcase, it is fitted with a rechargeable battery pack and two sets of Antenna Boards. The Sentinel is perfect for on-the-go defense against electronic harassment, psychotronic/psychic attacks, voice-to-skull and more. This product is twice (2x) as powerful as the Tabletop Defender and two-hundred times (200x) more powerful than the Personal Defender.

Just like other Defender models, the Sentinel uses High Frequency Scalar Waves which are modulated with two low frequency Activation Frequencies. The Scalar Wave protects and generates a shield to make it difficult for the Harassment Controlling Signals to get through to the individual. While the two low frequencies provide soothing to the body and brain to enable healing.

The Sentinel model also has a special unique circuitry which cyclically varies the generated frequencies as a countermeasure so that the perpetrators can't lock-on to the unit's frequency to circumvent its operation and defeat the unit.

This model can be powered either from the internal battery pack, or from house AC Power. The rechargeable battery pack will power the unit for about 4 days. The unit can be left plugged-in permanently for fixed home applications.

This model is designed for those individuals who already have tried the Tabletop or Personal Model and found that it only worked partially to relieve their symptoms, hence this much more powerful model will offer better protection.

All QuWave products come with a 100% Satisfaction Guarantee. Try it Risk-Free for 30 days. No-hassle returns with 30 days full money back for any reason.

QUWAVE DEFENDER - BE PROTECTED EVERYWHERE YOU GO

'SENTINEL' BRIEFCASE DEFENDER

USER GUIDE

1. MASTER POWER SWITCH -

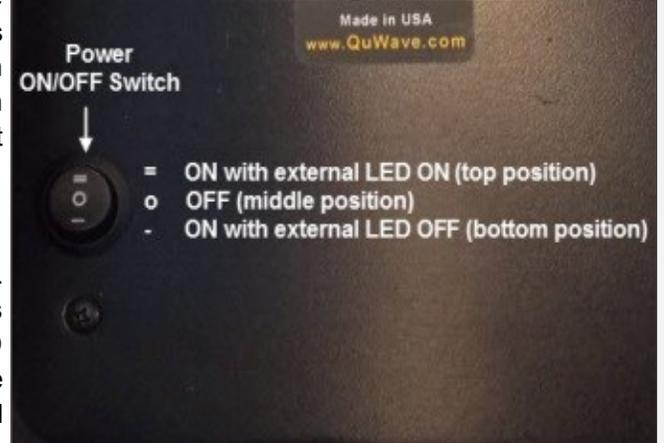

Please note that some models are manufactured with this extra power switch, and some are made without this switch. This does not effect operation in any way.

If your model does not have this switch, then you can skip to step #2.

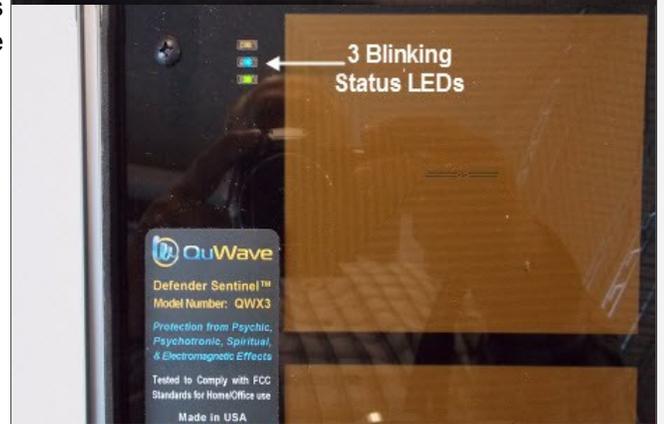

For models which have the switch, you will need to turn it ON. When you receive the Briefcase Model you need to turn on the Master Power Switch. This is a small hidden switch on the bottom right side of the inside panel. You need to reach in on the side where the foam is located (behind the foam) and turn the switch to the 'UP' position towards the panel (see photo). This switch should be permanently left in the ON position. You only turn this switch OFF when shipping the unit through the mail.

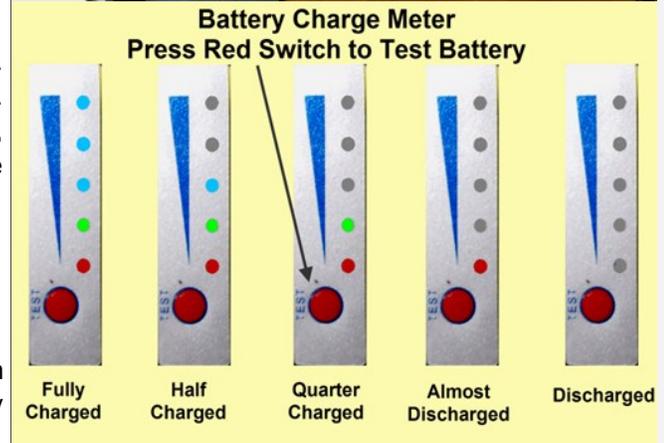

2. POWER SWITCH – This is the black round three-position switch. The unit is off when this switch is in the middle position. When it is pressed in the '=' position, the unit is ON and the external (white) LED light is also ON. When it is pressed in the '-' position the unit is ON, but the external LED light is OFF (for where an external distracting or inappropriate).

3. STATUS LEDs - The top lid houses the two antennae circuit boards. On the top-left there are three blinking LEDs to show proper operation. The Defender is ON when the three LEDs are blinking (yellow/amber, blue and green). The green LED should be blinking with a variable rate which shows that the frequency variation is working.

4. BATTERY STATUS METER - The unit has a battery status meter on the bottom panel (see photo). Press the red button to see the battery

USER GUIDE

5. CHARGING – The battery will have to be charged every few days. The unit has a standard power cord cable in the foam compartment. Please take this cord, and plug it into any standard AC Power wall socket. This is a universal charger that works on 120V or 220V power. For international sales, you will receive a proper plug converter for your country.

6 CHARGE INDICATOR LED - The unit has a charge LED (see photo). This is a two color LED. It will be green when the battery is ON (faint to conserve battery). It will be red (or blinking red) when the battery is being charged. When charging, the red LED will turn green when the battery has completely charged.

7. CHARGING TIME - Depending on the state of the battery, it might take between 2-5 hours to completely re-charge. Many customers charge the unit overnight. Also included is a Car adapter which allows it to be charged from your car.

8. BATTERY CONDITIONING - When you receive the unit, the battery state will be unknown, but in most cases it will be partially charged. We recommend an initial overnight charge before using the product. Please note that the battery may need to go through 4-5 charge/discharge cycles before it operates at its maximum charge capacity.

'SENTINEL' BRIEFCASE DEFENDER

USER TIPS

1. Please keep the unit dry as the Sentinel Defender briefcase is not waterproof and water may damage the unit.
2. The Sentinel Defender generates a field in all directions with a large diameter. For desired results, you need to be within the field of the unit. This model is meant for those that are highly affected and thus designed to be close to the effected individual for maximum protection. The closer you are to the unit, the more you will be within its protective field.
3. The Sentinel Defender is designed for maximum protection for those customers who are being seriously affected by external forces. The Sentinel generates a protective field about 200ft in diameter in all directions, but this is for 'normal' situations. For those customers who are being seriously afflicted, we recommend that you be within 10 feet of the unit for maximum protection. The closer you are to the unit, the more protection you will receive. The field from this unit goes right through the case and other objects such as walls etc.
4. Every human body and mind is different and responds at a different rate to the scalar/solfeggio waves generated by the Defender.
5. It may take anywhere from a few days to two weeks for your body to sync with the QuWave product's field and to feel the beneficial effects. This is normal, so please be patient, and try the unit for at least two weeks before deciding that it is not working for you. Also, the healing effects are cumulative and may take time to achieve their full potential.
6. Some people might experience an overwhelming or uncomfortable feeling in the body and mind when they first use the product. This is perfectly normal and temporary and indicates that the product is working. It happens due to a temporary increase in symptoms during the cleansing or detoxification process when your body tries to dispose toxins at a faster rate than it can cope with. You might need to give your body some time to adjust. Use the unit for only a few hours at a time until you get accustomed to the healing energy.
7. All QuWave products have a full 1 year warranty on labor, materials, and workmanship. This even covers the battery. Please contact QuWave for specific information.
8. All QuWave products have an UNCONDITIONAL 30 DAY 100% SATISFACTION GUARANTEE. If you are not satisfied with any QuWave product within 30 days after receiving it, you simply return it for a full refund, no questions asked. Please contact QuWave for specific information.

WARNING: PLEASE BE DISCREET WHEN TRAVELING WITH THIS PRODUCT.

DO NOT TAKE THIS UNIT TO THE AIRPORT OR IT MIGHT GET CONFISCATED !!!
